

# KraneSIM 6000

The **KraneSIM**, Crane Operator Training Simulator, is a full size advanced crane operations training simulator. It is designed to meet the training requirements of offshore operators and contractors, oil companies and training providers.

**KraneSIM** can fulfil an organisations needs for routine and/or specific crane training and related vessel operations. The **KraneSIM** solutions are designed to meet OPITO standards.

The full-sized platform-based **KraneSIM-6000** recreates a crane operators cab providing a totally immersive learning environment with either mixed dome, projection system or large HD LCD/LED screen options.

Standard features include:

- Generic or crane specific plug-and-play panniers
- Pedestal, knuckle boom, box boom cranes
- Any offshore installation design / layout
- Variable weather conditions
- Comprehensive selection of malfunctions
- Déjà vu for session recording and review
- Fully integrate with competency assessments
  - LOLER
  - BS 7121
  - API
  - NORSOK
  - OPITO
  - IADC
