

# DrillSIM 5

The **DrillSIM-5** is the PC/laptop-based version of our wide range of classroom-based drilling and well control simulators.

Utilising the same downhole mathematical model as our larger simulators, the **DrillSIM-5** provides interactive training with all the control panels typical of the portable simulators but graphically represented, providing the end user with a common operational interface.

## Features

- Laptop/PC based drilling and well control simulator.
- Full selection of rig types for drilling and workover – land, jack-up, floater
- Unlimited exercises (snapshots)
- Individual or team exercises
- Fully portable version allowing exercises to be practiced away from a training centre at a time convenient to the user
- Many of the operating capabilities of the larger **DrillSIM** product range
- Graphical representation of all control panels
- IP connected for delivery of training to multiple students in a class
- Multiple units can be connected providing a sophisticated multi-station training environment when used in conjunction with the **DrillSIM Suite Manager** and/or the **DrillSIM Educator** package

## Operating Interface

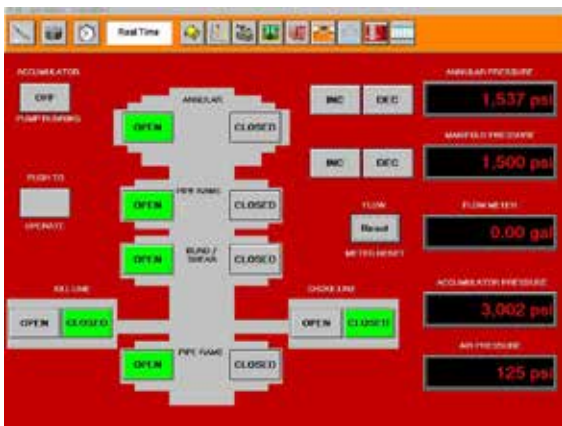

Realistic on-screen representation of all controls and instrumentation.

- Pictorial display of rig floor equipment activity
- Mud pump controls
- Drawworks controls
- Rotary and/or top-drive controls
- Remote choke control console
- BOP controls
- Manifolds and mud pumps

## Software

Windows based operating environment running **Drillsim** Drilling and well control mathematical model.

- **Drillsim** student licence
- **Drillsim** Instructor licence
